EDUCATION

Kristu Jayanti College

BA in Psychology, Journalism &
English Literature

2015 – 2018 · Bengaluru

Parseable

May 2025 – Mar 2026

Product Designer

Led end-to-end design of the core product experience, defining workflows for exploring and analyzing telemetry data across logs, metrics, and traces.

Designed investigation interfaces and interaction models for debugging production issues using high-volume telemetry data.

Owned the UX for AI agent observability, enabling teams to monitor and troubleshoot LLM agent behavior and AI system performance.

Partnered closely with engineers to ship scalable interfaces for querying, filtering, and navigating large telemetry datasets.

Established interaction patterns and information architecture for complex developer workflows across observability and infrastructure.

Appsmith

May 2022 – Jul 2023

Product Designer

Led the front-end developer experience end to end, taking full ownership of design projects from research through testing.

Redesigned the JavaScript library UI, actions system, and error handling flows, improving the core app-building experience on the platform.

Drove continuous UX improvement across several product areas, with a focus on reducing friction for developers building internal tools.

DeepSource

Dec 2019 – Aug 2021

Product Designer

Redesigned the product and website to improve the developer experience during static analysis and pull request review.

Built Zeal, DeepSource's component-based design system, from scratch and maintained it across the product.

Shaped the brand's visual identity in close collaboration with the founders.

Conducted user research and usability tests to identify UX issues and drive design improvements across the end-to-end experience.

Mentored junior designers and maintained design quality standards for the team.

Freelance

Feb 2019 – Jan 2021

UI/UX Designer

Designed a B2B platform for solar energy product bidding and order tracking.

Designed a mindfulness and mood-tracking mobile app.

Worked with startups and agencies to design and help ship web and mobile products.
